Charles R. Roestad (ps.)

present position: CI staff  
C/ops cora branch  
east Asia & Africa

1963 - Viet Nam - dep. ch.  
sp. ops. branch.

+ to HQ - [N. VN]/CI desk.  
~~then~~

27.03

DCOS [redacted] 68-70

13-5

70 [Thailand] DCOS/ext. ops.  
71-72 Statfor narcotics  
& dangerous drugs.

then to "NARCOG" HQ liaison  
on drugs 7/83-7/75

1975 → CI staff / SOB → sensitive  
CI matters.

(2)

These  
are  
Dan Neiswanger's  
initials

expertise in East Asian  
& CI.

inhouse investigations:

never did any of them.

did work on an "Oswald Task Force"

2 or 3 <sup>FDIA</sup> suits late 9 or 10/75.  
info had to be processed  
& C/CIS decided to have  
ops off do review.

(DN) one as well as a  
primary contact @  
2 investigators from SJC.  
which was going on at  
same time

"much the same as Russ  
Holmes is doing right now"

no research & analysis  
that he was aware of.

CI/SIG - heard of →  
apparently component

(3.)

under Angleton before  
(D.N.)<sup>3</sup> joined staff.  
never clear what did  
"tightly held compartmented  
component"  
may have dealt w/ cooks  
& cipherers - there is still  
a "residual branch" in  
CIS that deals w/ that

CIBIG was part of OR&A.

"D" was (is) component  
that deals w/ NSA - all  
matters

station "close support  
team" monitored commo  
per NSA requirements

I had responsibility on  
Agency's part to respond  
to NSA requirements

separate from CIS.

TSD → support for tech.  
ops also separate.

(4)

was not "Special Intelligence"  
was "Investigations!"

if SIG worked codes  
would have had high  
level liaison @ D.  
+ SIG may have been  
tasked by D for things  
that required CI knowledge  
pure supposition.

Ray Rocco or Russ Holmes  
would know best about  
SIG.

SIG would have opened  
201 cause HHD defector.

only 2 pieces of paper  
Agency originated prior  
to assn.

a year to open? doesn't  
know if unusual - he  
would have opened in  
59 on first hearing. Could  
have been a soft file

(5)

met = P<sup>115</sup>

but never heard of  
consolidation of files  
when Rocky commission  
looked into it.

Micktenbaugh "hits a note"  
but can't recall.

Didn't know Annie wrote  
History.

only photo he recalls  
in file is M.M.M.

FOIA's C.E. 237.

doesn't recall series

Bustos doesn't ring a bell

Robert Wall Os.  
Bill Perkins Task  
[Robert Litwak] (ph) Force.  
Os.

about 15 or 20 worked on  
FOIA sanitization

LEN BREA (ph)

Tony Geltie (ph) S/EO

[KEN JASPER] Os

Paul Hartman - Roccia's "hench" on  
investigation

(6)

material withheld from  
55C - about 10 document  
but were shown to them  
on specific request.  
irrelevant sources +  
methods - identity of  
agents.

met Rocca twice - can't  
recall when. - sat in on  
a 55C sessions @ him.

never have been able to  
locate delineation agree.  
has never heard of it  
but "from his lips."

Rocca's memos: interesting  
theory in sense Castro  
was trying to give us  
a signal. But wondered  
why Rocca waited ten  
years to advance it.

Swenson: no Bells.

Piccolo - okay memory -  
sometimes fuzzy.
